FLOWERING AND ORNAMENTAL TREES

BETULA alba laciniata

Each
CUTLEAF WEEPING BIRCH

The weeping white branches and fine glossy green cutleaf foliage of this variety make it desirable as a lawn specimen. Young trees have bronze-brown bark which changes to white with age.

5 to 6 ft.....	6.75
6 to 8 ft.....	8.25

Pendula

EUROPEAN WHITE BIRCH

Spring only

6 to 8 ft. B. & B.....	7.50
8 to 10 ft. B. & B.....	10.00

Note—Available with 2, 3, 4 & 5 stems—Write for quotations.

papyrifera

AMERICAN WHITE BIRCH

Spring only

3 stem, balled in peat

5 to 6 ft.....	6.75
6 to 7 ft.....	8.50
Large clumps, B & B, stems 1½" and up, per stem	10.00

CERCIDIPHYLLUM japonicum 30 ft.

KATSURA TREE

A shrubby tree when young with heart shaped leaves. Leaves deep green above and silvery green beneath. In fall the leaves turn purplish-red and yellow. Does particularly well in damp soil. A very symmetrical tree of about 20 feet ultimate height.

6 to 8 ft. B. & B.....	22.50
8 to 10 ft. B. & B.....	27.50
10 to 12 ft. B. & B.....	35.00

CERCIS canadensis 20 ft.

AMERICAN REDBUD

This bushy tree is very attractive in early spring when its branches are covered with clusters of rose-pink flowers. It is effectively used in shrub borders where its showy, spring flowers followed with large heart-shaped, deep green leaves adds variety to the planting. Tolerates some shade.

3 to 4 ft. high.....	3.00
4 to 5 ft. high B. & B.....	12.00
5 to 6 ft. high B. & B.....	18.00
6 to 8 ft. Peat Moss Ball.....	22.50

CORNUS florida 20 ft.

WHITE FLOWERING DOGWOOD

The rare beauty of Dogwood in spring when it is white with bloom, or in summer with its glossy green foliage, changing in fall to gorgeous reds, is hard to equal. The white flowers are two to three inches in diameter. It adds beauty to any planting. (Spring planting only.)

3 to 4 ft. high B. & B.....	10.50
4 to 5 ft. high B. & B.....	16.50
5 to 6 ft. high B. & B.....	19.50

florida rubra 20 ft.

RED FLOWERING DOGWOOD

Preferred by some garden lovers because of the showy rose colored flowers. It has all the desirable growing habits of the white flowering variety. A grouping of Red Flowering with the White is very attractive. (Spring planting only.)

3 to 4 ft. high B. & B.....	15.00
4 to 5 ft. high B. & B.....	19.50

ILGENFRITZ NURSERIES, INC.

ORNAMENTAL TREES

CRATAEGUS crusgalli 30 ft.

Each **COCKSPUR THORN**

This tree has many long slender thorns and a rather symmetrical shape. The flowers are attractive with small buds and the red fruit has a thin dry flesh. Leaves turn red in fall.

6 to 8 ft. B. & B.....	17.50
8 to 10 ft. B. & B.....	22.50

oxycantha pauli 12 ft.

PAULS SCARLET THORN

A very showy variety of hawthorn with bright flowers in spring. Useful as a specimen plant.

5 to 6 ft.....	9.75
----------------	------

phaenophyrum (cordata) 20 ft.

WASHINGTON HAWTHORN

A heavy fruiting thorn with a round head. The fruit hangs on longer than some others.

6 to 8 ft. B. & B.....	17.50
8 to 10 ft. B. & B.....	22.50

MAGNOLIA soulangeana 15 ft.

SAUCER MAGNOLIA

Very showy, large purplish-pink flowers. A fine tree for specimen planting.

3 to 4 ft. B. & B.....	13.50
4 to 5 ft. B. & B.....	19.50
5 to 6 ft. B. & B.....	27.50

MALUS floribunda 15 ft.

FLOWERING CRAB

Leaves dark green, flowers deep carmine fading to white. Fruits yellow and red.

3 to 4 ft.	3.25
4 to 5 ft.....	4.00
5 to 6 ft.....	6.00

ioensis plena 15 ft.

BECHTEL CRAB

A double flowered variety of the above. Very showy.

2 to 3 ft.....	3.25
3 to 4 ft.....	4.00
4 to 5 ft.....	5.75

pumila niedzwetzkyana 20 ft.

REDVEIN CRAB

A variety with red bark, red leaves and red flowers.

3 to 4 ft.....	3.25
4 to 5 ft.....	4.00
5 to 6 ft.....	6.00

purpurea eleyi 15 ft.

ELEY CRAB

A round headed short trunked tree with white and pink flowers appearing with the foliage.

3 to 4 ft.....	3.25
4 to 5 ft.....	4.00
5 to 6 ft.....	6.00

PRUNUS americana—NEWPORT 15 ft.

NEWPORT PURPLELEAF PLUM

The deep pink flowers and dark purple foliage make this an excellent tree where color contrast is desired.

3 to 4 ft.....	3.25
4 to 5 ft.....	5.00
5 to 6 ft.....	6.00

cistena

PURPLE SAND CHERRY

Small pinkish-white flowers, bright red leaves lighter than Prunus Newport.

3 to 4 ft.....	3.50
4 to 5 ft.....	5.00

ILGENFRITZ NURSERIES, INC.

ORNAMENTAL TREES

Each

PRUNUS serrulata 15 ft.

KWANZAN CHERRY

A double flowering tree with upright branching, forming a symmetrical broad top with glossy green foliage. The tree has very showy, double-pink flowers in early spring.

4 to 5 ft.....	7.50
5 to 6 ft.....	9.00

triloba

FLOWERING PLUM

A handsome, low-growing tree whose branches become covered with double pink flowers in April and May.

2 to 3 ft.....	2.50
3 to 4 ft.....	3.00
4 to 5 ft.....	4.00

SORBUS aucuparia

EUROPEAN MOUNTAIN ASH

A very fine ornamental tree of pyramidal growth with attractive, feathery foliage. Bears clusters of white flowers in spring, followed by scarlet berries.

5 to 6 ft.....	6.75
6 to 8 ft.....	8.25
8 to 10 ft.....	11.75

SHADE TREES

SHADE TREES

ACER dasycarpum 60 ft. **SILVER MAPLE** Each
One of the fastest growing shade trees, the Silver Maple is valuable for park and street planting. The leaves are light green, silvery underneath.

BUDDLEIA

BUTTERFLYBUSH

Buddleia are highly recommended and should be in every planting. Especially suitable for the sunny border. The shrub generally freezes back in winter and should be pruned to live wood each spring.

BUDDLEIA *davidi-charming* 5 ft. CHARMING BUTTERFLYBUSH

Fragrant pink flowers in spike-shaped clusters.

No. 1 1.75

d.—*dubonnet* 5 ft.

DUBONNET BUTTERFLYBUSH

Close set spikes of deep wine red on sturdy stems of large leathery foliage. A profuse bloomer.

No. 1 1.75

d.—*Ile de France* 5 ft.

ILE DE FRANCE BUTTERFLYBUSH

Similar to the Charming variety except that the flowers are deep violet.

No. 1 1.75

d.—*Royale Red* 5 ft.

ROYAL RED BUTTERFLYBUSH

A new variety producing exceptionally long spikes of dark red flowers from July until frost.

No. 1 1.75

CALYCANTHUS *floridus* 6 ft.

COMMON SWEETSHRUB

This is an old favorite often called Strawberry Bush because of the spicy, fragrant, chocolate-colored flowers in June or July. The leaves are large and glossy green. Tolerates shade.

15 to 18 in..... 1.40

18 to 24 in..... 1.75

2 to 3 ft..... 2.10

CARYOPTERIS

BLUE MIST

Low-growing shrub covered with numerous clusters of powdery blue flowers from August until frost. The leaves are aromatic and of an attractive silvery-green. They like sun and appear well in the perennial border. Grows 18 to 24 inches high.

No. 1 Field Grown Plants..... 1.50

CHAENOMELES *lagenaria* 4 ft.

FLOWERING QUINCE

Brilliant scarlet flowers borne on the inner stems in early spring. In the fall the plant bears yellow, pear-shaped, fragrant fruit. Likes full sun. Excellent for foundation or shrub planting or even for hedging. Fruits often used for perfuming handkerchief boxes or clothes closets.

18 to 24 in..... 1.60

2 to 3 ft..... 2.00

Hedge Grade Seedlings. 8 to 10 in..... .35

CORNUS

Among the garden dogwoods are many sorts of unusual merit for ornamental flowers, fruits and twigs. They are mostly of bushy habit, have attractive showy bark and large, dark green leaves which change to pleasing shades of red and purple in the fall. They are very hardy and will thrive in shade. The flowers are attractive as is also the fruit which is eaten by birds.

CORNUS *alba siberica* 8 ft.

SIBERIAN DOGWOOD

An upright growing shrub with creamy white flowers in May and June followed by bluish-white berries. Branches are coral red.

SHRUBS

LONICERA

This group contains handsome foliage shrubs, usually bushy but well formed. The flowers are small and showy appearing in abundance. Small colorful berries in the late summer and fall add to their beauty. Honeysuckles are some of the earliest of shrubs to leaf out in the spring.

LONICERA bella albida 10 ft. WHITE BELLE HONEYSUCKLE

White flowers, branches slightly pubescent. Smooth gray leaves, red berries.

2 to 3 ft..... 1.50

3 to 4 ft..... 2.00

fragrantissima 6 ft.

WINTER HONEYSUCKLE

Earliest to bloom, small fragrant white flowers. Leaves dark green above, gray beneath; red branches.

3 to 4 ft..... 2.00

4 to 5 ft..... 2.75

wheeling

WHEELING RED HONEYSUCKLE

This is an improved form of the very popular RED TATARIAN HONEYSUCKLE.

2 to 3 ft..... 1.50

3 to 4 ft..... 2.00

PHILADELPHUS

These shrubs are sometimes referred to under the common name of Syringa. The mockorange is an old favorite with gardeners. While there are a great many varieties of mockorange, we propagate and list here only the most desirable.

PHILADELPHUS coronarius 8 ft.

SWEET MOCKORANGE

The green-white flowers, most fragrant of all mockorange, completely cover this shrub in June. It is an old favorite and and very desirable in the shrub border.

2 to 3 ft..... 1.75

3 to 4 ft..... 2.25

virginalis—VIRGINAL 7 ft.

VIRGINAL MOCKORANGE

The most popular of recently introduced hybrid mockorange. It has waxy, semi-double flowers which are very fragrant and appear intermittently throughout the season. The foliage is larger than that of other types, light green in color. The habit of growth is upright; useful for corner plantings or in the shrub border.

2 to 3 ft..... 2.20

3 to 4 ft..... 2.75

3 to 4 ft.....	2.25

VINES

VINES

There is a charm and attractiveness in vines, which cannot be equalled by any other type of hardy plants. Aside from their beauty they may be made doubly effective by concealing ugly and unsightly places; growing over arbors or on porches, they afford shade and privacy.

Many types are very effective ground covers. Under trees and on slopes where grass will not grow, they form an attractive carpet of green.

AMPELOPSIS triscupidata

Each
BOSTON IVY

The best vine for covering walls. It has tendrils by means of which it climbs and is rapid growing after it becomes established. The foliage is glossy green, overlapping forming a dense cover, changing in autumn to beautiful shades of crimson and yellow. Black fruits remain well into winter.

No. 1 field grown, well rooted plants..... 1.50

CELASTRUS orbiculatus

ORIENTAL BITTERSWEET

This oriental variety of bittersweet is very hardy and rapid growing, producing an abundance of brilliant orange and scarlet fruits in small clusters. Very showy after the leaves have fallen, and provides an excellent bouquet for home decoration during the winter months. It does almost as well in shade as in the sun.

No. 1 extra strong plants..... 1.50

scandens

AMERICAN BITTERSWEET

The brilliant red and yellow berries, cut with long stems and dried, make excellent winter bouquets. The vine is rapid growing, with good foliage, and is very attractive when the yellow flowers appear, followed by the brilliant fruit. Excellent for porches and arbors.

No. 1 field grown, well rooted plants..... 1.50

CLEMATIS paniculata

SWEET AUTUMN CLEMATIS

The fragrant star-like flowers are produced in great numbers in late summer. The feather-like seed pods which follow give it the appearance of a second blooming period. The vine grows rapidly and has luxuriant green foliage.

No. 1 field grown, well rooted plants..... 1.50

Jackmani

Height 10 ft. It is a rapid climber and blossoms freely from July to September. The large, purple-violet flowers are very showy. Probably the best known and most popular of the large flowering varieties.

JUNIPERUS **JUNIPER**

This group of evergreens is very important in ornamental landscape work. It includes a large number of trees of different habits of growth; from very narrow upright types to low spreading and creeping varieties. They withstand adverse conditions and as a general rule do better in open sunny locations and light soil.

All Junipers are easily trimmed and can be kept in bounds for many years. Periodic shearing or trimming tends to produce more dense foliage, which is occasionally desired, especially in the upright pyramidal growing types.

JUNIPERUS chinensis columnaris **BLUE COLUMN CHINESE JUNIPER**

Pyramidal in growth, with attractive green foliage, makes this tree indispensable for corner plantings or as an accent tree when height is desired. Foliage is spiny and requires little or no pruning.

5 to 5½ ft.....	62.50

cuspidata nana

DWARF JAPANESE YEW

Very slow growing; dwarf form. One of the best for formal gardens, edgings, borders, etc. Blackish green color, dense and compact growing. Often substituted for Boxwood in this area. Semi-spreading but is easily shaped by shearing.

12 to 15 in.....	10.50
15 to 18 in.....	13.50
18 to 24 in.....	17.50
2 to 2½ ft.....	21.50

media hatfieldi

HATFIELD YEW

This evergreen is a vigorous grower of upright, compact, conical habit, with ascending branches. Foliage dark glossy green. Endures shade as well as sunny locations. Its upright compact habit makes it very desirable as a specimen tree or to accentuate foundation plantings.

18 to 24 in.....	10.50
2 to 2½ ft.....	15.50
2½ to 3 ft.....	21.80
3 to 3½ ft.....	26.00

media hicksi

HICKS YEW

One of the most beautiful and interesting of the Taxus. The numerous branches ascend almost vertically although it makes a main stem. The color of the needles are a rich, dark glossy green, and the habit very narrow and columnar. It is frequently as broad at the top as at the bottom. It is a wisely chosen addition to any evergreen group.

18 to 24 in.....	10.50
2 to 2½ ft.....	15.50
2½ to 3 ft.....	21.80
3 to 3½ ft.....	26.00

media hiti

HITI YEW

A new introduction in the yew family. An upright grower, but having more spread than other upright types. Compact habit of growth with lustrous green foliage. Excellent for foundation plantings with its companion, the spreading yew.

18 to 24 in.....	10.50
2 to 2½ ft.....	15.50
2½ to 3 ft.....	21.80
3 to 3½ ft.....	26.00

EVERGREENS

THUJA

ARBORVITAE

The flat lacy foliage of the arborvitae is familiar to everyone, being the most commonly used evergreen for landscape purposes. There are types to fill every need from the low globular to narrow pyramid. They stand shearing and are, therefore, excellent hedge plants.

Of the two species commonly known, the *Thuja occidentalis* is considered to be the hardier. The oriental varieties, especially the gold foliated types, should be planted in locations where they receive some protection from winter wind and sun.

Arborvitae are considered to thrive best on heavy soils.

Each

THUJA occidentalis

AMERICAN ARBORVITAE

Very popular conical shaped evergreen with loosely textured light green foliage. It is highly recommended for corner plantings or in the garden for screening purposes. It stands shearing and is excellent for use in evergreen hedges.

3 to 4 ft.....	9.00
4 to 5 ft.....	12.00

o. compacta

PARSONS ARBORVITAE

A dwarf and compact form. Very slow growing. A more or less oblong pointed ball of fresh green foliage. Useful where a relatively small space is to be occupied in the landscape planting.

10 to 12 in.	2.50
15 to 18 in.....	5.00
18 to 24 in.....	6.75
2 to 2½ ft.....	8.25

o. douglassi

DOUGLAS PYRMIDAL ARBORVITAE

The foliage of this interesting variety is short, dense, dark green and is arranged in small curled or twisted clusters, giving it a sturdy and healthy appearance. It grows better in shade and keeps its winter color better than most other Arborvitae.

4 to 5 ft.....	14.50
5 to 6 ft.....	16.50
6 to 7 ft.....	19.50

o. globosa

GLOBE ARBORVITAE

Foliage dark green. Tree, globular in form. A favorite evergreen for years in the foundation planting of the small home. This type is also recommended where a balance entrance effect is desired both for home and garden.

PATENTED CLIMBING ROSES

Minimum Retail Price..... 2.50
DR. J. H. NICOLAS—(Pat. No. 457) (J&P).
Wealth of large, double rose-pink blooms appearing all summer long. Very fragrant.

PATENTED FLORIBUNDA ROSES

Minimum Retail Price..... 2.50
BETTY PRIOR—(Pat. No. 340) (J&P).
The buds are lively red opening to shell-pink blooms with five dogwood-like petals. Very profuse bloomer all summer.
GOLDILOCKS—(Pat. No. 672) (J&P).
The first real golden yellow floribunda. Buds resemble hybrid teas in form and are 3½ inches across. Very profuse and long lasting.
PINOCCHIO—(Pat. No. 484) (J&P).
The best everblooming floribunda. Buds are rich salmon, flushed with gold changing to clear pink as they open. Very profuse bloomer all summer long.
RED PINOCCHIO—(Pat. No. 812) (J&P).
A superb combination of its parents Pinocchio and Donald Prior. Large 3½ inch blooms borne in long-lasting clusters. Glowing velvety red.
WORLD'S FAIR—(Pat. No. 362) (J&P).
Clusters of velvety, 4 inch, rich scarlet red, double blooms. One of the best of the floribundas.

STANDARD ROSES

	Each	Each
	1-9	10 & up
2 Year No. 1.....	1.85	1.75

RED H. T. ROSES:

Ami Quinard—Dark red velvety petals, golden centers. Very fragrant.
Christopher Stone—Semi-double, scarlet and crimson.
Etoile de Holland—One of the very best crimson roses, richly fragrant.
Grenoble—Scarlet-crimson, long stemmed, blooms do not fade.
Margaret McGredy—Unusual scarlet hue, even and dependable bloomer.
McCredy Scarlet—Another splendid McGredy rose, blooms usually scarlet, vary considerably. Fine grower and abundant bloomer.
Poinsettia—Well formed long buds, richly colored flowers of poinsettia scarlet.
Red Radiance—Bright cerise, still justly popular.

PINK H. T. ROSES:

Editor McFarland—Deep pink, another old favorite.
Mrs. Chas. Bell—Lovely warm pink blooms.
Picture—Strong vigorous and very double rose, velvety rose-pink with undertone of salmon.
Pink radiance
Globe-shaped cupped flowers of two-toned pink; light silvery tone inside and deeper pink outside. Vigorous free bloomer.

ILGENFRITZ NURSERIES, INC.

ROSES

YELLOW H. T. ROSES:

Golden Charm—Well shaped flowers of clear lemon-yellow.

Golden Dawn—Sunflower-yellow, well formed, fragrant blooms.

Soeur Therese—Vigorous, free blooming long pointed yellow buds, full double bloom.

Yellow Condessa (Golden Sastago)—Strong grower, fine bloomer, flowers fragrant, buttercup yellow changing to clear yellow.

Mme. Joseph Perraud

Long slender buds of nasturtium-orange opening to a golden-buff; petals tinged with pink. A very popular exhibition rose.

WHITE H. T. ROSES:

Frau Karl Druschki—Very hardy, sometimes classified as a H.P., but is a steady bloomer with flowers very late in the season, white with pink flecks at base of petals.

K. A. Viktoria—Strong grower, full double snow-white flowers tinted with faint lemon center.

TWO-TONE OR BICOLOR H. T. ROSES:

Betty Uprichard—Semi-double, ruffled flowers, salmon-pink, more salmon inside, copper outside.

Condessa de Sastago—Fragrant flowers of raspberry red inside of petals golden yellow on outside. One of the finest garden roses.

Countess Vandal—Pointed buds opening to carmine, pink, buff and gold.

Edith Nellie Perkins—Long pointed buds, rich orange-pink on outside petals, lighter pink inside.

President Hoover—Large flowers with a beautiful blending of cerise-pink, flame, scarlet and yellow. Strong and vigorous grower.

Talisman—One of the most popular of all roses. Brilliant red and gold buds, opening to scarlet-orange and rich yellow.

POLYANTHA ROSES

	Each 1-9	Each 10 & Up
2 Year No. 1.....	1.85	1.75
GLORIA MUNDI—Bright orange, most attractive, a steady and profuse bloomer.		
GOLDEN SALMON		
Large clusters of bright salmon-orange. Grows 20 inches tall. Ideal for a dwarf hedge along a walk.		
ORLEANS—Rosy crimson, vivid color.		
RED RIPPLES—Unfading rich red bloom in immense trusses.		

CLIMBING ROSES

	Each 1-9	Each 10 & Up
2 Year No. 1.....	1.85	1.75
Climbing American Beauty —Large, double, bright crimson, vigorous, hardy and a free bloomer.		
Dorothy Perkins —Deep pink double flowers are borne in clusters and are sweetly fragrant.		
Dr. Van Fleet —Large flowers often four inches across, delicate shade of flesh-pink on outer surface, deepening to rosy-flesh in center.		
Pauls Scarlet Climber —Vivid scarlet and most attractive when in full bloom. Will often repeat in fall, color does not fade, a real standout.		
Silver Moon —Large white flowers often four inches across, large clusters of yellow stamens in center add to its beauty.

- ✓ ANOKA—Extremely hardy and early bearer. Fruit good size colored red. A fine Summer apple.
- ✓ BALDWIN—Large, bright red, excellent for cooking or eating. Season November—December. Keeps until April.
- ✓ BANANA—(See Winter Banana).
- ✓ CORTLAND—Large, deep red. Good eating and cooking. Excellent for salads because flesh stays white. Season October to December or later.
- ✓ DELICIOUS—(See also RED DELICIOUS; KIRBY DELICIOUS)
- ✓ DUCHESS (See VanBuren red)
- ✓ EARLY HARVEST—Medium size, pale yellow. Excellent for eating but can not be stored or shipped. Season July—August.
- ✓ EARLY MCINTOSH
Closely resembles its McIntosh parent in all features except for the presence of the fragrant aroma that surrounds the standard McIntosh. Ripens 10 days after the yellow transparent and about 2 weeks before the regular McIntosh. Delicious flavor.
- ✓ FAMEUSE—(Snow) Medium size, red striped. Flesh white. One of the best eating apples. Season October—Mid-winter.
- ✓ GALLIA BEAUTY—(Red Rome) Medium to large, solid red. Especially adapted to southern Ohio. Season November—May.
- ✓ GRIMES GOLDEN—Medium size, golden yellow. November to January.
- ✓ JONATHAN—Medium size, dark red. One of the best commercial varieties, excellent quality, early bearer. Season November—January.
- ✓ KIRBY RED DELICIOUS—An improved delicious type of a solid, dark red color. Colors 15 to 20 days before the ordinary Delicious and when fully colored is still quite hard and continues to hang tightly on the tree. Has proven to be one of the best apples for the commercial orchard. Very flavorful, highly recommended. Season: November-March.
- ✓ LODI—Improved Yellow Transparent. Late July and August.
- ✓ MACOUN—Size and flavor similar to McIntosh, somewhat darker, more solid red. Blossoms frost resistant. Ripens about October 10.
- ✓ MCINTOSH—Medium to large, rich red, white flesh. One of the most important commercial variety. Season September—January and later.
- ✓ NORTHERN SPY—Large, bright red, striped. One of the most dependable commercial varieties. Excellent for cooking or eating. Season November—March.
- ✓ RED ASTRACHAN—Medium large, white flesh. Its color is pale green overspread with light and dark stripes. A crisp and juicy apple of fine quality. Ripens July to August.
- ✓ RED CANADA—Crisp, juicy, richly flavored, fruit medium to large. Deep red striped. Ripens about September 30.

ILGENFRITZ NURSERIES, INC.

FRUIT TREES

APPLE—continued

- RED DELICIOUS—Large, bright red. One of the best commercial varieties; an excellent eating apple. Season November to March.
- RED ROME BEAUTY—(See Gallia Beauty)
- RED SPY—Large, bright red, bears earlier than regular Northern Spy and has a solid red color. November—March.
- RHODE ISLAND GREENING—Large, smooth dark green over-spread with yellow. One of the best cooking apples. Ripens about October 1.
- STAYMAN WINESAP—Medium, dull red. December—April.
- STEELE RED—(See Red Canada)
- TOLMAN SWEET—The leading sweet apple. Skin tough with clear yellow color. Flesh firm and fine flavored. Excellent for culinary use. November to January.
- TURLEY WINESAP—A newer Winesap seedling. Large and well formed—darker red than Stayman Winesap. Expected to eventually surpass Stayman Winesap. December to May.
- VAN BUREN RED (DUCHESS TYPE)—Medium to large sized, red striped. A fine cooking apple. August-September.
- WAGENER—Medium to large, bright light red striped. Bears young and heavily. Season October—February.
- WEALTHY—Medium, bright red. Especially adapted to cold climates. Season October—January.
- WINTER BANANA—Large size. Skin smooth, waxy colored pale yellow, with deep red blush on cheek. Tender, juicy, slightly acid. Excellent for home and market. October to March.
- YELLOW DELICIOUS—Similar to Grimes Golden in color and shape but larger in size and with better flavor. Tree vigorous, annual bearer. Season November to March.
- YELLOW TRANSPARENT—Medium, waxy yellow. One of the best extra early apples. Season July—August.

5-in-1 Apple For the City Orchard

This one tree orchard produces large fruits of 5 outstanding varieties ripening throughout the entire late summer and fall seasons. Perfect for those who have but a limited space in which to garden. The fruits are large size and of highest quality.

These 5 wonderful varieties on one tree—Red Delicious, Tolman Sweet, McIntosh, Winesap, and Yellow Transparent.

W—White flesh Y—Yellow flesh F—Freestone

✓ BELLE OF GEORGIA—W-F A beautiful white fleshed freestone peach, very large and fair quality. Ships well. Tree vigorous and very productive. Ripens about one week earlier than Elberta.

✓ CHAMPION—W-F Medium size, very fine quality, honey sweet. August 10-15.

✓ CUMBERLAND—W-F Large size very attractive firm peach. Excellent quality. August 5-12.

✓ EARLY CRAWFORD—Y-F A good peach for market or home use. September 1-5.

✓ EARLY ELBERTA—Y-F Very large, good quality. September 5-10.

✓ ELBERTA—Y-F The most widely planted of all peaches. Fruit very large, good quality and flavor. September 10-20.

✓ FAIRHAVEN

Very new variety originated at the South Haven Michigan Experiment Station. Matures about one week before Halehaven. Large, highly colored freestone fruit. Resists browning when cut making it valuable for freezing in the home locker.

✓ GOLD DROP—Y-F A strictly Michigan peach. Medium size, fine flavor. September 25-October 1.

✓ GOLDENEAST

Ripens in late August. Very large, high, red color. A yellow freestone. Its wonderful flavor makes it an outstanding canner.

✓ GOLDEN JUBILEE—Y-F Large size, Elberta type. Ships better than most early varieties. August 15-20.

✓ HALEHAVEN—Y-F Cross between South Haven and J. H. Hale. Large size, good quality. August 25-30.

✓ J. H. HALE—Y-F One of the largest peaches. Elberta's strongest competitor. September 5-10.

✓ KALHAVEN—Y-F Cross between J. H. Hale and Kalamazoo. Fruits are medium to large; very firm and good shippers. Ripens just before Elberta.

✓ LATE CRAWFORD—Y-F Tree adapted to many soils and climates. September 20-30.

✓ LIZZIE

A very late and distinct Elberta type. Ripens as much as 3 weeks after Elberta. A large, highly colored, very attractive fruit. Excellent late season peach for roadside market.

✓ MIKADO

Very early yellow-fleshed peach of quality and large size. Its extremely early ripening date makes it a favorite with the home garden. Should be planted with some other variety.

✓ NEW DAY—Large, attractive yellow, nearly freestone. Ripens about 4 days later than Golden Jubilee. Colors well before it is ready for picking. Hangs well on trees, stands handling well.

ILGENFRITZ NURSERIES, INC.

FRUIT TREES

PEACH—continued

- ✓ ORIOLE—Y-F One of the best early peaches. Ripens about August 10.
- ✓ REDHAVEN—A new introduction that merits a position in every orchard. Fruit brilliant red, freestone, medium size, slightly elongated shape, skin smooth and tough. Flesh yellow, firm and fine textured. Sweet, of excellent quality. Matures about 30 days before Elberta.
- ✓ RIO OSO GEM—Extra large, highly colored, firm fleshed peach of high quality. A yellow freestone ripening about Sept. 20.
- ✓ ROCHESTER—Y-F One of the best early peaches. Medium size. Ripens about August 15-20.
- ✓ SALBERTA—Y-F A highly successful cross between Salwey and Elberta. October 1-5.
- ✓ SHIPPERS LATE RED—Y-F Elberta-shaped, but larger in size. Golden yellow covered with red. September 27.
- ✓ SOUTH HAVEN—Y-F Color deep golden yellow with an attractive crimson cheek. High quality. Good canner and shipper. August 25-30.
- ✓ SULLIVAN EARLY ELBERTA—Tree and fruit similar to the Elberta but about 7 to 10 days earlier. A good commercial variety to lengthen the Elberta season.
- ✓ SUMMERCREST—A large oval, yellow-fleshed freestone which ripens about one week earlier than Elberta, one of the most popular varieties for local market. Fine for eating and canning and quite good for freezing.
- ✓ SUNHIGH—Yellow fleshed, large, oval and firm. When picked ripe it is freestone but clings slightly when picked for shipping. Skin red, a fine variety for canning and freezing. Ripens about one week after Golden Jubilee.
- ✓ TRIOGEM—Yellow, freestone, fine shipping and market variety. Ripens about 20 days before Elberta, a few days after Golden Jubilee.
- ✓ VALIANT—Y-F A seedling of Elberta, with extra rich flavor. Ripens September 1.
- ✓ WELCOME HALE—Very large, yellow, freestone. Good quality. ripens about August 28. Exceptionally hardy, bears at three years. Good shipper.

BARTLETT
CLAPP FAVORITE

FRUIT TREES

STANDARD PEARS

The trees furnish excellent fruit for both eating out of hand and for canning purposes. Unlike other fruits, it should not be allowed to ripen on the tree but should be picked green and stored in a dark, cool place. Under such conditions the fruit will ripen perfectly.

2 Year Old Trees

	Each	Each
	1-4	5-9
3/4 in. Diameter—5 to 7 ft.....	2.50	2.00
1 1/8 in. Diameter—5 ft. & up.....	2.00	1.60

7/16 in. Diameter—3 ft. & up.....	1.25	1.10
BARTLETT—Fruit large, color clear yellow with a faint blush. One of the most popular varieties. Season September.		
BOSC (Beurre Bosc)—Fruit large, long, tapering neck; color dark rich yellow overspread with cinnamon-russet. October—November.		
CAMPAS—This type, an improved Kieffer, excels the old favorite and should be planted to replace it extensively. High degree of blight resistance. Excellent pear for winter storage. Bears same time as Kieffer.		
CLAPP FAVORITE—Fruit large, lemon-yellow, mottled and dotted with crimson. Late August—Early September.		
CONFERENCE—Fruit medium size, high quality, clear yellow color with faint blush. Midseason.		
DUCHESS d'ANGOULEME—Fruit very large, dull yellow, streaked, spotted and netted with dull russet. October—November.		
FLEMISH BEAUTY—Large, color clear yellow with red blush. September—October.		
GORHAM—Resembles Bartlett but ripens two weeks later; keeps a month longer. Rich flavor, and spicy aroma.		
SECKEL—Fruit small, color yellowish-brown with a lively russet-red cheek. September—October.

- ABUNDANCE—Early and abundant bearer; color pinkish-red, freestone, roundish shape. Season: August—September.
- BRADSHAW—Dark violet-red color, very large size, quality very good. Season: August.
- BURBANK—Early bearing; dark red color, large in size, freestone, roundish in shape. This variety is self-sterile, requires cross pollination. Season: September.
- FELLENBERG—(Italian Prune)—Favorite plum of excellent quality. Recommended for garden and marketing. Fruit purple, good size, flesh juicy and sweet. Ripens in September, fine for canning.
- FRENCH DAMSON—Excellent purple plum for market, good quality and size. Considered a freestone, but will cling occasionally in some areas. Prolific bearer. Tree vigorous, spreading top. Ripens in September.
- GERMAN PRUNE—Very fine quality; dark blue, freestone, egg or prune shape. Season: September.
- GRAND DUKE—One of the best plums, very large size, color dark red, freestone. Season: September.
- GREEN GAGE (Rheine Claude)—Excellent quality; greenish-yellow color, medium size, freestone. Season: Late September
- ITALIAN PRUNE—see FELLENBERG.
- LOMBARD—Excellent canner, violet-red color, medium size, oval in shape, freestone. Season: Middle of September.
- MONARCH—Good quality, dark purple color, very large, roundish oval in shape, freestone. Season: September.
- SHROPSHIRE DAMSON—Good quality, purple color, small, oval in shape, freestone. Season: September.
- STANLEY—Prune type, being a cross between Agen and Grand Duke. Fruit large, dark blue with thick bloom. Flesh tender, sweet and juicy, of greenish-yellow color. Freestone. Sept. 12.
- YELLOW EGG—Very large plum; color yellow, egg shaped, freestone. Season: Last of August.

Orchardists and commercial fruit growers please write for quotation on larger quantities.

FRUIT TREES

WHY NOT FRUIT RIGHT AWAY

No need to wait five or more years before you pick the first fruits from your back yard. Now, FOR THE FIRST TIME — we offer a supply of Carefully Selected orchard-size trees. They have been expertly trained with an eye towards producing a Ready-To-Bear fruit tree that is as nearly a perfect tree that can be grown.

In addition to producing fruit almost immediately, bearing age trees have the added advantage of having been grown and trained to maturity by experts assuring you of a healthy, symmetrical, disease free tree.

We feel that when all things are considered the trees offered below are a real value. Why not try a Ready-To-Bear fruit tree this year?

SMALL FRUITS

SMALL FRUITS

Because of the size of the roots there is danger, during the first winter, of frost lifting small plants which have been set in the fall and have not had time to become established. We, therefore, recommend spring planting of small fruits.

GRAPES

1 to 9 | Each
10 to 24 | Each
25 & Up |
|--|----------------|------------------|-----------------|
| 2 Year No. 1..... | .55 | .45 | .40 |
| ✓ CACO—New variety, known as the best red grape. Vine vigorous, strong and prolific. Flesh sweet. Ripens about the same time as Concord. | | | |
| ✓ CONCORD—The leading blue grape. Vines vigorous and productive. Bunches large. Good for shipping and for all home uses. Ripens about Sept. 15. | | | |
| ✓ DELAWARE—Berries light red. Vines vigorous, fruit firm, sweet and juicy. Perfect table grape. Ripens before Concord. | | | |
| ✓ FREDONIA—A new black grape. Heavy bearer, clusters medium sized, berries large, skin thick, flesh juicy, excellent shipper. Ripens two weeks before Concord. | | | |
| ✓ GOLDEN MUSCAT | | | |
| A wonderful new golden yellow grape. One of the most delicious grapes for home use and for the local roadside market. The large full clusters possess a delicate muscat aroma. | | | |
| ✓ NIAGARA—Most popular green grape of excellent commercial qualities. Berries and bunches large. Very productive. Ripens midseason with Concord. | | | |
| ✓ SENECA | | | |
| Often called the skinless grape. Golden honey colored. Very sweet flavor. Vigorous grower and heavy producer. A fine grape for storage. | | | |
| ✓ SHERIDAN | | | |
| Very high quality blue-black in color. Ripens 7 to 10 days after Concord. Very sweet—fine flavor. Excellent table grape and for roadside market. | | | |

25 to 99 |
|--|----------------|------------------|------------------|
| No. 1 well rooted plants..... | .20 | .14 | .12 |
| ✓ CUMBERLAND—Old fashioned Blackcap. A heavy yielder of large firm berries, delicious flavor. Commercially perfect. | | | |
| ✓ NEW LOGAN | | | |
| A very new development that ripens 10 days earlier than Cumberland while equaling it in quality and productiveness. Rapidly gaining in favor with the home grower. | | | |
| ✓ MORRISON | | | |
| A new black raspberry of outstanding merit. The fruit is jet black, large, and has less seeds than most raspberries. Ripens July 16th. | | | |

SMALL FRUIT

RED RASPBERRIES

	Each 1 to 5	Each 10 to 24	Each 25 to 99
No. 1, well rooted plants.....	.25	.23	.20
CHIEF—Berries red, large, suitable for commercial purposes. Ripens a week earlier than Latham. Excellent quality.			
INDIAN SUMMER—Everbearing, red raspberry. Bears twice a year. Deep red berries, long and thimble shaped. Flavor rich, desirable for market and home.			
LATHAM—The famous red raspberry; luscious red berries, round plump. Rich flavor, firm, excellent for shipping or canning Midseason ripening.			
NEWBURGH—A new favorite, worthy of mention. Plants vigorous, resistant to mosaic and other diseases. Berries large, bright red, heavy bearer, ripens a few days earlier than Latham.			
SUNRISE—A new introduction, very promising. Color bright red, but turns dark red on ripening. Berries pick easily, are firm, fine textured, juicy and non-crumblly. Ripens two weeks earlier than Latham.			

GOOSEBERRIES

	1 to 9 Each	10 & Up Each
No. 1 well rcoted plants.....	.90	.80
DOWNING—Old favorite of high merit. Fruit pale green, smooth. Seldom attacked by mildew. Thin skinned, tender, juicy and sweet. Bushes very productive. Midseason.		
JOSELYN—The fruit is similar to Downing but more elongated. Is reddish, smooth, and of good flavor.		
POORMAN A new variety producing fruits of enormous size. Fruit ripens quite early and is red in color. Excellent quality. Highly recommended for the heavier soils where it is a good producer.		

STRAWBERRIES

(Please order in multiples of 25 plants)

Everbearing varieties		
Well rooted plants.....	per 25	3.25
	per 50	6.00
	per 100	10.00
GEM—Berries large, well rounded, medium red color, with a rich sprightly flavor. Bears continuously from the end of regular season to late fall.		
MASTADON—Everbearing type. Extra-large, deep red berry. Full		
MINNESOTA 1166—A rugged everbearer, medium sweet, deep red. A new variety of great promise. flavor and very appetizing.		
STREAMLINER The most perfect of the everbearers this latest introduction gives you everything that is desirable in a strawberry. The ideal berry for the home garden. Bears heavily in June and then again in August until frost.		
SUPERFECTION One of the newest and finest. Perfect for the home garden in that it does very well under a variety of conditions. Plants set in the spring will bear in August—twice next year. Very easy to grow.

SMALL FRUITS

STRAWBERRIES—continued

- WAYZATA—A new everbearing strawberry, large, brilliant red with vivid green hulls. Heavy producer, bearing continuously until fall. Without a doubt, one of the most luscious berries. Disease resistant.

THE FOLLOWING JUNE BEARING VARIETIES:

Well rooted plants.....per 25 1.75
per 50 3.00

- BLAKEMORE—Large, dark red berries with slightly acid flavor. Excellent for canning and preserving. Fruiting season: early.
- CATSKILL—Plants large, very vigorous, yield very heavy. Berries very large, dark red but glossy and attractive. Mild sub-acid and good quality. Ripens a few days after Premier.
- DORSETT—Outstanding new introduction. Surpasses the Premier in quality. Berries bright red, large and perfectly formed, deliciously sweet flavored. Early season.
- FAIRFAX—Dark red berries, vigorous grower, large crop, worthy to be in every garden. Midseason bearer.
- PREMIER—Juicy, dark red, large berries of excellent quality, firm flesh. Ripens early over a long period.
- ROBINSON—A leading variety with large berries and vigorous foliage. Berries sweet, juicy and mild, glossy red in color. Excellent for eating, canning and cooking. Midseason ripening.
- SENATOR DUNLAP—Old favorite, commonly planted. Vigorous, healthy and very productive. Berries large, light and dark scarlet. Quality excellent.
- SPARKLE

The best late-bearing variety yet developed. Very excellent for freezing. Peak of ripening about one week later than Premier. The plants are vigorous and produce runners freely.

TEMPLE

The easiest of all strawberries to grow. Grows equally well on light, sandy soil and heavy water-soaked kinds. Sets new plants freely. The large firm high quality berry is excellent for freezing, shipping, and local home use.

BOYSENBERRIES

	per 50	4.50
MARY WASHINGTON—First of all asparagus. Stalks large, oval, tender with green tips. Plants rust resistant and very pro- ductive		

STATEMENT OF INSPECTION FOR TRUENESS-TO-NAME

Amherst, Mass.
September 19, 1951

To Whom It May Concern:

All of the one to three year apple, pear, plum, and sweet cherry and two year sour cherry varieties propagated and now growing in the nurseries of I. E. Ilgenfritz' Sons Company, Monroe, Michigan, have been examined by the Massachusetts Trueness-to-name Inspection service. To the best of our knowledge, these trees are true to name as they now stand in the nursery row.

A. P. FRENCH

POLLINATION

POLLINATION AND FRUIT SETTING

Many tree fruits require the pollen of other varieties for fruit setting. Most apples, pears, sweet cherries and many plums require cross-pollination. Peaches, apricots, and sour cherries, on the other hand, are generally self-fruitful. Varieties and kinds of fruit requiring cross-pollination are dependent first upon having suitable pollinating varieties nearby accomplished by planting two or more varieties and secondly upon the activity of insects, mainly honey-bees. Further information as to suitable varieties of fruit necessary to secure adequate pollination and fruit setting is as follows:

Apples

Among those varieties of apples that are notorious for their self-unfruitfulness and for being poor pollenizers are Baldwin and R. I. Greening. Many others including McIntosh, Jonathan, Grimes, Northern Spy, and Wealthy need pollenizers for best results.

Among the most effective pollenizers are the Kirby Red Delicious and Steele Red varieties. Others include the Rome Beauty, Yellow Transparent, Yellow Delicious, Winesap and Duchess.

Pears

All pear varieties are considered commercially self-unfruitful. Effective pollenizers are the Bosc, Conference, Gorham and Flemish Beauty varieties. The Bartlett and Seckel varieties are considered as being unable to pollinize each other.

Peaches and Nectarines

Peaches and nectarine varieties are commonly self-fruitful but a very few varieties, such as the Late Crawford, Rochester and J. H. Hale peaches are self-unfruitful. Consequently, these varieties should be interplanted with other varieties. The Hale-haven peach is considered an excellent pollenizer.

Cherries

Sour cherries are all self-fruitful. All commercial varieties of sweet cherries are self-unfertilized. The Bing and Napoleon (Royal Ann) varieties are both self-sterile and inter-sterile to each other but pollinize other varieties as well. When planting one of these varieties it will be necessary to plant one of the following varieties with it: Black Tartarian, Schmidt or Windsor. Windsor is one of the best pollenizers for all varieties except itself. Always plant at least two varieties of sweet cherries but do not plant Bing and Napoleon together. Sour cherry varieties are not effective pollenizers for sweet cherries.

Plums

Most plum varieties do not fertilize themselves and it is important to plant at least two different varieties to insure fruiting. Japanese varieties should be interplanted with Japanese varieties and European varieties with other European varieties to secure proper cross-pollination. European varieties are somewhat self-fertile but produce better if two or more varieties are planted. The two species do not intercross freely.

Of the Japanese varieties, Abundance and Burbank planted together insure proper cross-pollination. Any of the European varieties may be interplanted to obtain the desired results.

GUARANTEE

GUARANTEE ON NURSERY STOCK

ILGENFRITZ NURSERIES, INC. agrees that the plants and other materials to be furnished are to be of top quality and that planting and other work to be performed will be executed in a first class professional manner.

ILGENFRITZ NURSERIES, INC. will exercise care to have all stock true to name. Any stock that proves untrue to name will be replaced without charge.

ILGENFRITZ NURSERIES, INC. guarantee that all nursery stock is alive and healthy at time of planting. Any stock which proves otherwise within sixty days after planting will be replaced without charge, except as below noted: **PROVIDED** that purchaser has taken care to apply sufficient water so that soil is properly damp **to the depth of the lowest roots**, yet not so wet that it is muddy. **FAILURE TO SUPPLY SUFFICIENT WATER OR APPLICATION OF TOO MUCH WATER VOIDS THIS GUARANTEE.**

Rhododendrons, Azaleas, Hollies and Andromedas are entirely dependent upon care given them after planting. We, therefore, guarantee only that they are alive and healthy when planted. (Cultural information on these plants will be supplied on request.)

No stock is guaranteed that fails from lack of care, excessive moisture, lack of water, poor drainage, frost, insect pests, disease, vandalism, fire or any other cause beyond our control.

Stock planted in the Fall is guaranteed to live through the Winter and start growth in the Spring. Fall-planted deciduous stock which fails to start in Spring, will be replaced free. Fall-planted Evergreens will be replaced at one-half price.

The customer agrees to pay for the planting of all replacements.

NO STOCK IS GUARANTEED UNTIL THE ACCOUNT IS PAID IN FULL.
